

Spirale appositamente fresata per forature veloci, lunga durata della punta ed eccellente concentricità. Realizzate in acciaio speciale HSS DIN338. Geometria ideale per utensili a filo o a batteria, per forare su acciaio, acciaio fuso, legato e non legato, ghisa grigia, ghisa a grafite sferoidale, acciaio sinterizzato, nichel, ottoni, etc. fino a 990 N/mm².

Specially milled spiral for fast drilling, long life and excellent concentricity of the tip. Made of special steel HSS DIN338. Ideal geometry for corded or battery tools for drilling steel, cast steel, alloyed and unalloyed, gray cast iron, spheroidal graphite iron, sintered steel, nickel, brass, etc. up to 990 N/mm².
